

Change in Apple Routing Requests during the COVID19 Pandemic

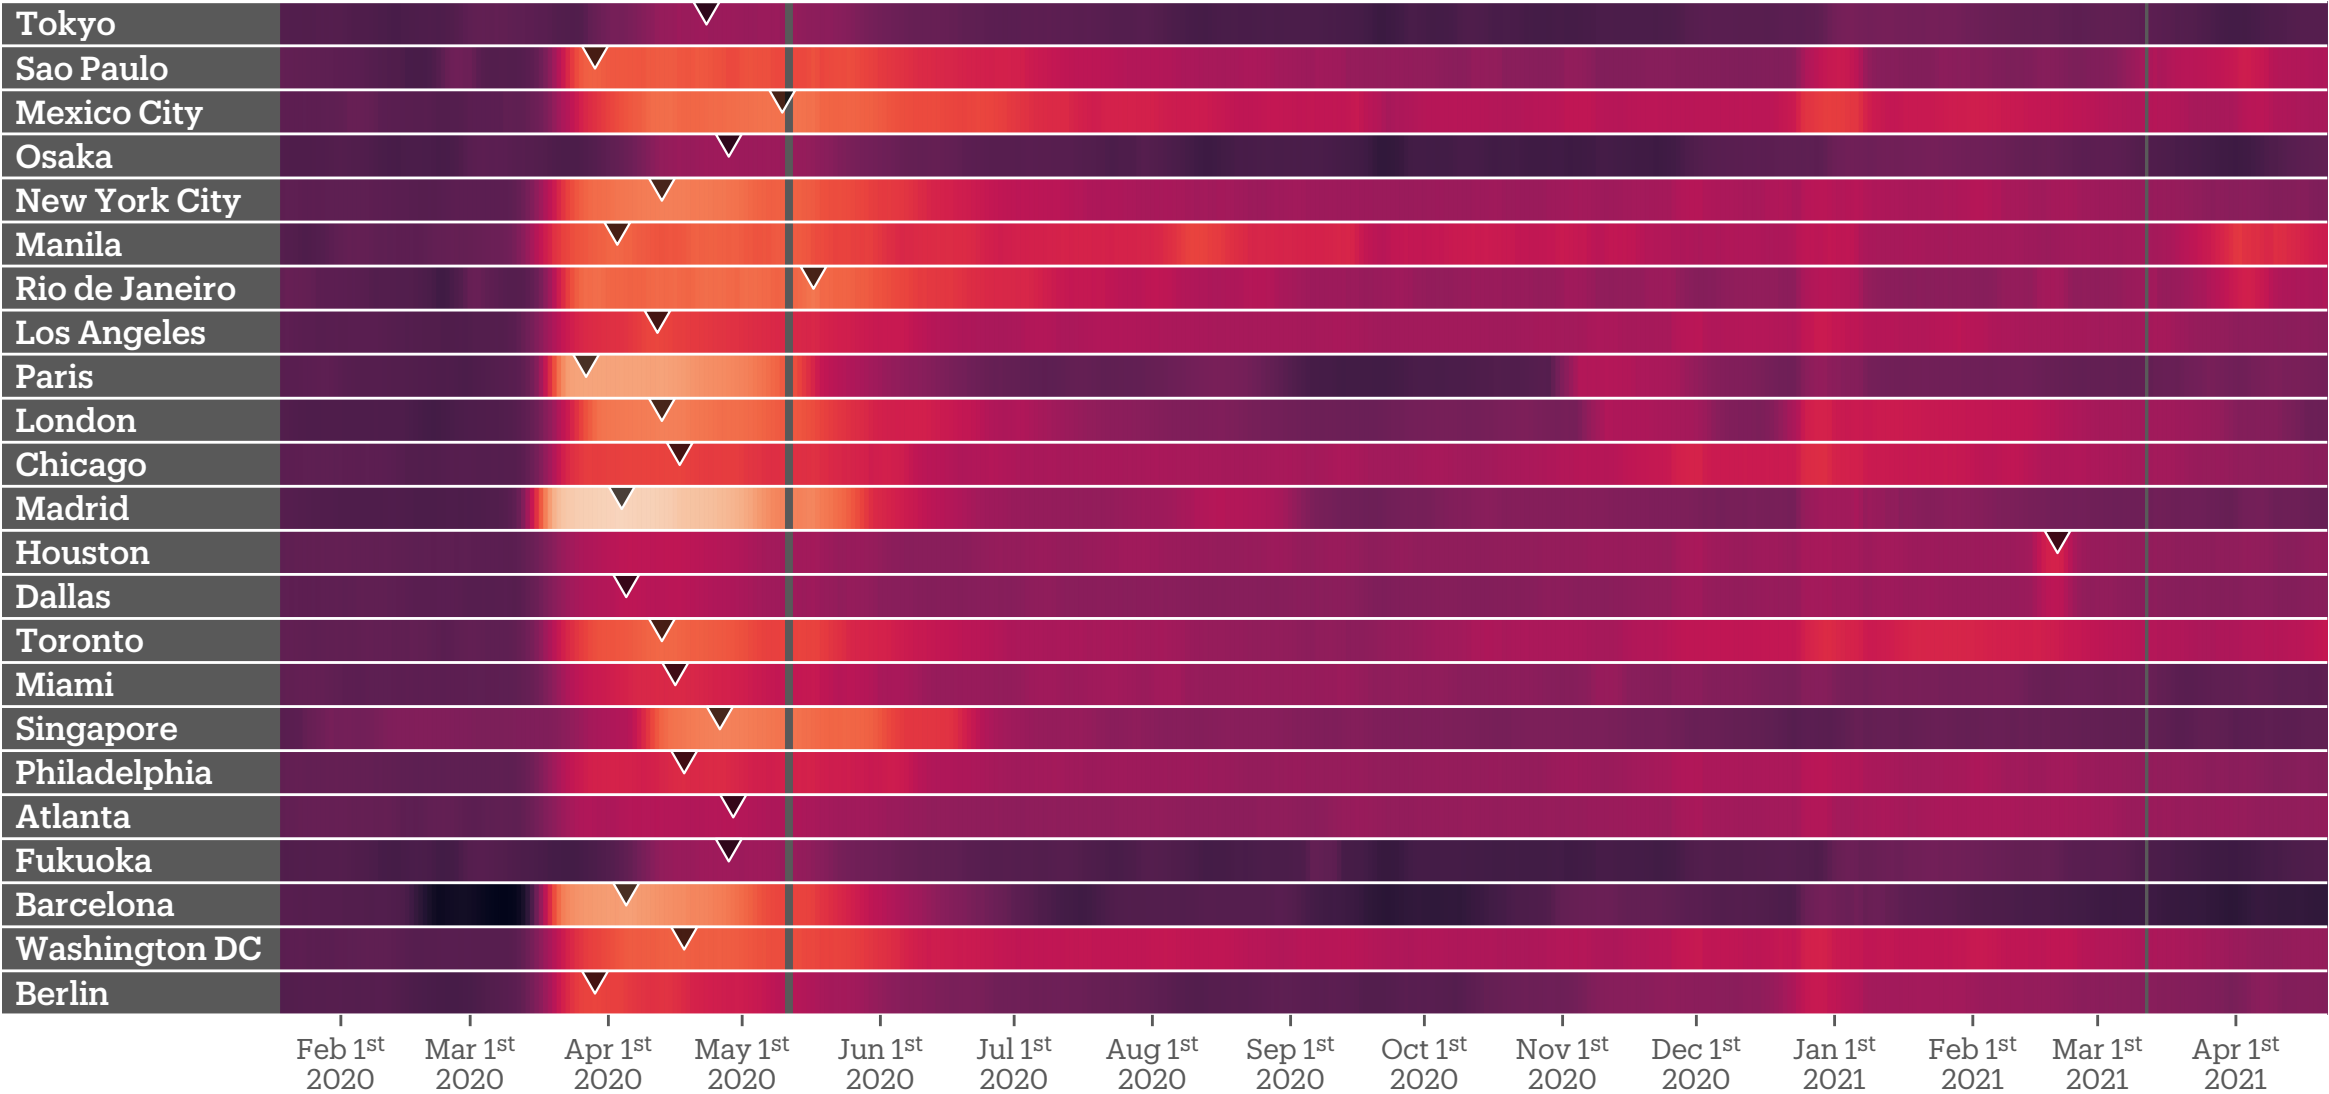

Relative volume of directions requests for the largest cities compared to a baseline volume on January 13th 2020

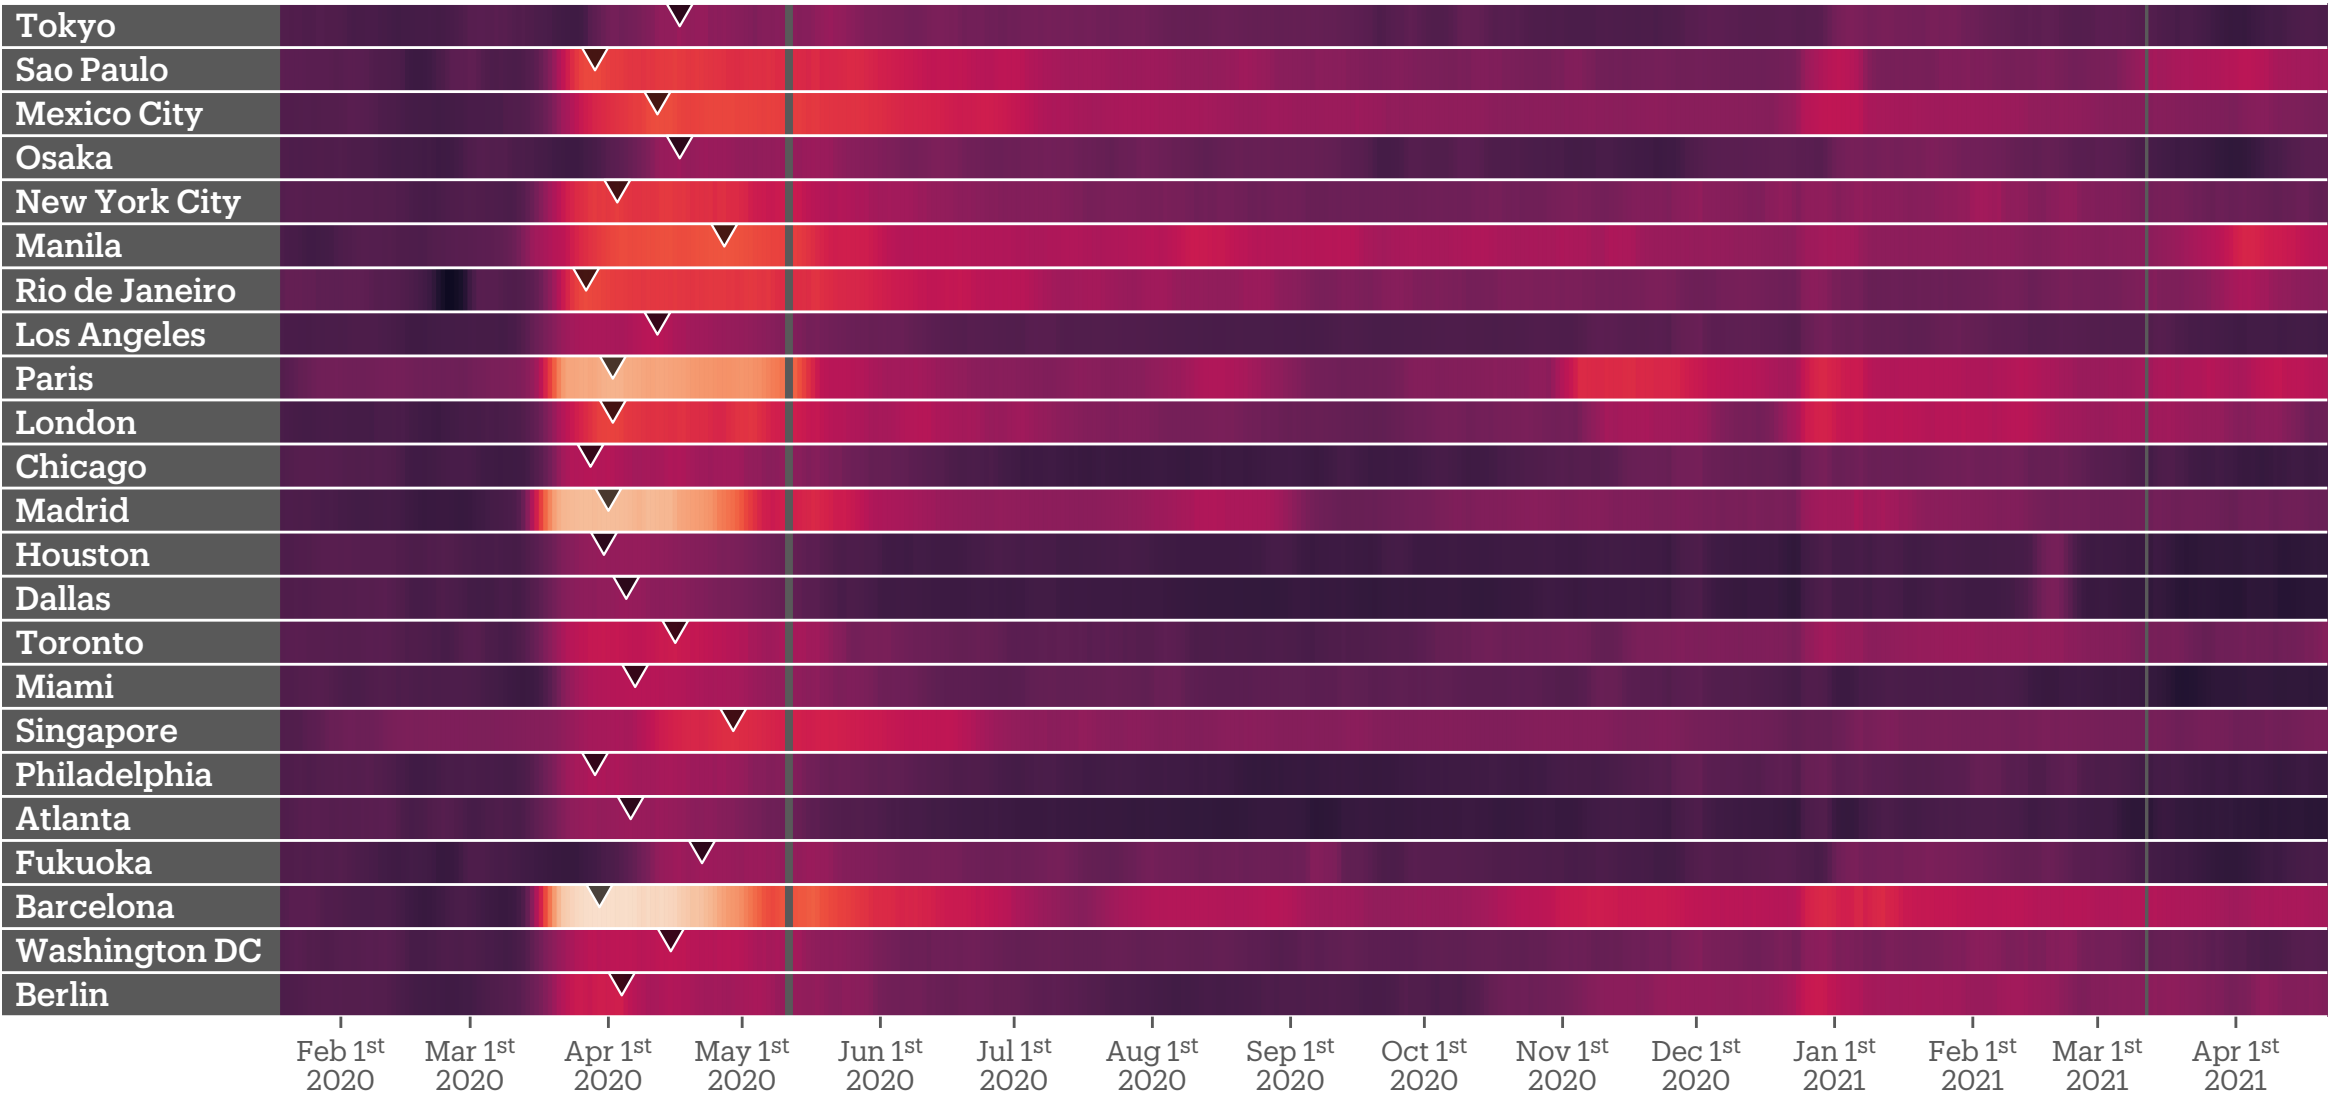

Driving

Transit

Walking

Visualization: Cédric Scherer | Data: Apple Maps Mobility Trends (accessed on April 23rd 2020).
Change in traffic requests is shown as 7-day rolling average. Data for May 11th–12th, 2020 and March 12th, 2021 are not available. Shown are all largest cities, sorted by population, that are contained in the dataset and include transit request data. Downward traingles indicate the lowest value within the visualized time period.
